

# Your Passwords

At MLC you have two primary accounts to keep track of: your MLC Account and your MLC G Suite Account. This page will outline some information on passwords for those two accounts.

## MLC Account

We have recently rolled-out the ability for students, faculty, and staff to request a password reset without the need to contact Network Services directly. Here is how you can do it:

## Change Your Password

1. visit the [MLC Self Service Password Reset](#) site
2. enter your current MLC Account username and password
3. click
4. on the next page, click on
5. follow the instructions to create your new password and then click  near the bottom of the page
6. wait for the system to complete the password change and then you are ready to go

## Reset Forgotten Password

1. visit the [MLC Self Service Password Reset](#) site
2. click on
3. enter your personal email address and click
4. an email will be sent to your personal email address (usually the email address you supplied to us when you applied)
5. check your personal email address and either click on the link in the email or copy-and-paste the resulting code into the text field on the forgotten password site and click
6. follow the instructions to create your new password and then click  near the bottom of the page
7. wait for the system to complete the password change and then you are ready to go

# Find My Username

Because you need your MLC Username in order to reset a forgotten password, we have also supplied the ability to find out your MLC username as well.

1. visit the [MLC Self Service Password Reset](#) site
2. click on
3. enter your personal email address and click
4. the resulting page will give you your MLC username and an email will also be sent to your personal email address

As a tip, if it is not finding your username, attempt to enter your maiden name if you have married since you last attended Martin Luther College.

# Updating Recovery Email and/or Last Name

If you need to update information about yourself including your personal email address and/or your name, please submit an update to your personal by the [Information Verification](#) page on Portal. Once your request has been approved, your changes will make their way to the appropriate system.

Your personal email address is used for account information retrieval, so supplying us with an email address you will maintain access to regardless of where you are currently living or serving. Also, if possible, avoid using Yahoo or AOL accounts as they seem to have the most trouble consistently receiving emails from third party systems like our own.

# Periodically Changing Your Password

Every 6 months you will be prompted to change your password. Please do so or you could be locked out of your account and need to request a password reset (following the instructions above) in order to gain access to your account again.

# MLC G Suite Account

MLC offers each member of the campus family a [G Suite for Education](#) account to have and use. These accounts are provided by Google and currently have their own password functionality attached to them separate from your MLC Account.

If you have issues accessing your account, please use [Google's own recovery site](#) to attempt to recover your username and/or password. You can also find more documentation on Google's support site under the article titled [Change or reset your Google Account password](#).

You will not be prompted to change your password unless we have reason to believe that your account has been compromised.

If you are still having issues, please [file a support request with Network Services](#).
