

Using a Meta-Course

Some MLC courses have several sections of the same course. These can be combined into a single course, called a meta-course. Using a meta-course eliminates the need for posting/creating content in multiple locations for multiple sections.

Instructions

1. [Activate each course section](#) via the MLC Portal.
 2. Request a meta-course through [this form](#).
 3. That's it :)
- *The individual sections will still appear on your dashboard, but you can safely ignore them. Do all updating, grading, etc. in the meta-course.*
